

The Four Laws of Ecology

1) Everything is connected to everything else - humans and other species are connected/dependant on a number of other species.

2) Everything must go somewhere - no matter what you do, and no matter what you use, it has to go somewhere.

3) Nature knows best - Like it says, nature knows best.

4) There is no such thing as a free lunch - Everything you do must have a reason behind it. This law basically means you have to do something in order to get something in return.

5) Everything has limits – there is only so much...
